(54) THERMOPLASTIC PIPE NIPPLE

(57) Abstract:

PURPOSE: To prevent creeping by including a first elongated tubular portion with a first end for engaging a conduit and a second end for engaging a second portion of a nipple, and a second portion to be attached to a tank.

CONSTITUTION: The portion 2a of a pipe nipple is fitted around a portion 1a, which becomes an outer side so as to form an outline at its end where it is connected with the portion 2. This means that this portion is provided with a groove 3a. The portion 2a is connected with the aperture 6 of the tank 7 made from thermoplastic resin such as an HDPE. The portion 1a of the nipple consists of a reinforced polyamide and portion 2a of the nipple consists of a non-reinforced resin. The portion 1a has a lower tendency to deform under load than the portion 2a.

LEGAL STATUS

[Date of request for examination] 26.11.1993

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2715870

[Date of registration] 07.11.1997

[Number of appeal against examiner's decision]
